

## Assembly Instructions for Trapezoid Tables

1. Lay both End Panels down with cleat facing up.
2. Screw long posts into three holes along the back side of the end panels
3. Screw short posts into the holes running from back to front of end panels
4. Lay the back down with hole facing up
5. Insert the larger Rafix connectors in the big holes along both sides with the arrows pointing out
6. Screw the short posts in the holes along the bottom
7. Attach each side panel to the back by inserting the long posts into the larger Rafix connector, turn the insert with a Phillips head screw driver until the post is locked into the Rafix connector
8. Stand the back and both end upright
9. Lay the shelf down with the round holes or bottom facing up
10. Insert the smaller Mini-fix connectors into the holes along three sides of the shelf with all arrows pointing out
11. Place the shelf over the small post coming out of the back and two side assembly
12. From underneath the unit, use a Phillips head screw driver to turn the mini-fix connectors and engage the small post.
13. Center the top with the long side to the back of the unit.
14. Secure with wood screws.
